## PROFESSIONAL SUMMARY

Full stack developer with proven ability to lead development, mentor team members, and build robust end-to-end solutions across web and game development. Experienced in React, Next.js, ASP.NET Core, SQL, and cloud services, delivering production-ready features across multiple startups. Strong focus on scalable architecture, clean code, and shipping features that make a measurable difference.

## EDUCATION

|                                                                                                |           |
|------------------------------------------------------------------------------------------------|-----------|
| <b>Software Development Bootcamp</b> , Tech Educators Norwich                                  | 2025–2026 |
| <b>BSc (Hons) Computer Games Technology (2:1)</b> , Manchester Metropolitan University         | 2020–2023 |
| <b>A Levels:</b> Mathematics, Computer Science, Media Studies — Scarborough Sixth Form College | 2018–2020 |

## SKILLS

|                              |                                                                                |
|------------------------------|--------------------------------------------------------------------------------|
| <b>Programming Languages</b> | JavaScript, TypeScript, C++, C#                                                |
| <b>Web Development</b>       | React, Next.js, Express, Drupal, ASP.NET Core MVC, TailwindCSS, Bootstrap      |
| <b>Back-End</b>              | MySQL, PostgreSQL, SQL Server, EF Core, AWS (DynamoDB, Cognito), Azure, Docker |
| <b>Tools</b>                 | Visual Studio, VS Code, Rider, Git, GitHub, Jira, Perforce                     |
| <b>General</b>               | Debugging, Version Control, Agile Development, PC Building                     |
| <b>Soft Skills</b>           | Leadership, Teamwork, Communication, Adaptability                              |

## EXPERIENCE

|                               |                         |
|-------------------------------|-------------------------|
| <b>Web Developer (Intern)</b> | March 2026 – Present    |
| 2Toucans                      | <a href="#">Website</a> |

- Built responsive, accessible page layouts using Drupal, PHP, Twig and TailwindCSS, contributing to faster page delivery across the project.
- Developed a reusable component library used by other developers and designers, reducing repeated layout work across the codebase.
- Configured and refined Canvas sections including alignment, spacing, stacking rules and multi-column layouts, improving consistency across the site.

|                                   |                         |
|-----------------------------------|-------------------------|
| <b>Lead Developer (Part-time)</b> | Aug 2024 – Present      |
| Lifelong Fund                     | <a href="#">Website</a> |

- Led development for an MMORPG and Looter Arena game across a team of 4 developers, overseeing architecture and code quality in Unreal Engine C++.
- Managed sprint planning, backlog refinement, and milestone delivery, maintaining consistent output across a multi-disciplinary team.
- Mentored developers through code reviews and pair programming, improving code quality and accelerating onboarding of new team members.

## PROJECTS

### TrueHire — Full-Stack Application — Next.js / JavaScript / Supabase / Clerk / Ably

[Website](#) | [GitHub](#)

- Built a freelance hiring platform with job posts, proposals, contracts, and real-time chat, enabling end-to-end hiring on a single product.
- Implemented authentication, tiered subscriptions, role-based access, and proposal workflows using Clerk and Supabase, supporting multiple user types securely.
- Designed a clean, responsive UI with TailwindCSS and shadcn/ui, with safe error handling across routes and real-time presence updates.

### Blue Sky Realty (BSR) — Full-Stack Application — C# / ASP.NET Core / SQL Server / Azure

[GitHub](#)

- Built a full-stack property listing platform with role-based access control for Admin, Sales, and User roles, reducing unauthorised access risk.
- Integrated Microsoft Entra ID for OAuth authentication and GeoNames API for dynamic UK city lookup, with advanced filtering by price, area, bedrooms, county and city.
- Deployed to Azure with SQL Server, EF Core, Serilog structured logging, and automatic data seeding, enabling reliable repeatable cloud deployments.

## Converso SaaS — Full-Stack Application — Next.js / TypeScript / Supabase / Clerk / Vapi

[Website](#) | [GitHub](#)

- Built a full-stack SaaS platform enabling users to create AI voice companions for personalised study support, from authentication to billing.
- Implemented subscription billing and real-time data features using Clerk and Supabase, supporting a monetisable multi-tier product.
- Developed tutor creation tools, bookmarking, session history, and advanced search, with Sentry for monitoring and faster production issue diagnosis.
